Acel

ACEL LEO FIELD SERVICES

PRODUCT OVERVIEW

Deploy. Support. Sustain.

Three defined products. One accountable field-services partner.

Acel helps satellite operators, resellers, integrators and prime contractors bring LEO connectivity to difficult-to-serve sites, then support it through its operating life.

SELECT THE PRODUCT FOR YOUR REQUIREMENT

01 LEO DEPLOY

Commissioned, documented LEO sites

Surveys; import and custody; site delivery; installation; integration; testing and acceptance.

Per site, rollout wave or multi-country program

02 LEO MAINTAIN

Accountable support after go-live

Preventive and corrective maintenance; swaps; regional spares; remote support and reporting.

Recurring contract by site, country or network

03 LEO INFRASTRUCTURE

Sites ready to support reliable terminals

Mounts and poles; grounding; cabling; shelters; security; power and light civil works.

Site-specific scope or multi-site work package

HOW TO BUY

Purchase one product or combine all three under a single deployment and support program. Proposals specify countries, site counts, customer dependencies, deliverables, service windows and agreed response targets.

RELEVANT EXPERIENCE

Marlink: field installations serving World Bank locations in Djibouti, Rwanda and Timor-Leste. SES / Moov Africa: 70+ sites across Chad and Mali with installation and maintenance scope.
